PROFILE

Software Developer with 1.5 years of commercial experience building web and mobile applications — from architecture through implementation to production rollout. I work daily with Python (FastAPI, Django) and TypeScript (React, React Native, Next.js). I owned the end-to-end architecture of an AWS-hosted eCMR system and delivered an AI/RAG architecture inside a production CRM. Winner of 5 hackathons (3× 1st place, 2× 2nd place). Applied Computer Science student at Lodz University of Technology.
